

**ANGELOS K. KANELLIS (B.S., M.Sc., Ph.D.)**  
**Emeritus Professor**  
Group of Biotechnology of Pharmaceutical Plants  
Laboratory of Pharmacognosy  
Department of Pharmaceutical Sciences  
Aristotle University of Thessaloniki  
541 24 Thessaloniki, Greece  
Tel.: +30 2310 997656  
E-mail: [kanellis@pharm.auth.gr](mailto:kanellis@pharm.auth.gr)

**Education:**

- Bachelor of Science degree in Horticulture-Agronomy (March 1973), Agricultural University of Athens.
- Master of Science degree in Vegetable Crops. (March, 1984), University of California, Davis.
- Doctor of Philosophy degree in Horticulture. (August, 1987), University of Maryland, College Park.

**Teaching Experience:**

- Teaching of undergraduate and graduate courses at the Aristotle University of Thessaloniki, University of Crete, University of Athens and Mediterranean Agronomic Institute of Chania.

**Supervising up-to-today:**

- 17 post-docs, 7 Ph.D. students, 16 M.Sc. students and 5 technicians.

**Affiliation**

- Member of 4 national and international scientific societies.

**Participation in Scientific Meetings**

- Participation in 74 meetings with 74 presentations and 47 as invited speaker.

**Grant History:**

- 42 competitive grants from National and EU agencies.

**Professional Recognition (recent):**

- Associated Editor Frontiers in Plant Science, Section Plant Metabolism and Chemodiversity
  - Member of the Editorial Board of the journal “Postharvest Biology and Technology”.
  - Associated Editor, Frontiers in Sustainable Food Systems, Section Crop Biology and Sustainability
  - Associated Editor, BMC Biotechnology
  - Metrics (January 2021): Citations, 5073, h-index 38, i10-index 63
- Google Scholar: <http://scholar.google.gr/citations?user=ZLJoqwlAAAAJ>

**Main research interests**

**A. Nutritional properties of fruit and vegetables.**

- Enhancement of Vit. C and arginine levels in fruit

**B. Molecular Biotechnology of Secondary Metabolism**

- Isolation, functional and genetic manipulation of genes participating in the biosynthesis of pharmacologically active diterpenes from *Cistus creticus*, *Rosmarinus officinalis* and *Salvia fruicosa*.
- Manipulation of biosynthesis and oxidation of ascorbic acid (vit. C) in plants to enhance nutritional properties of fruit and to increase tolerance to stress.

### C. Molecular Biotechnology of Plant Stress

- Understanding the biochemical and molecular mechanisms by which low oxygen suppresses fruit ripening by isolating and characterizing a number of genes participating in low oxygen action on tomato and citrus fruit ripening.
- Arginine biosynthesis in tomato and its manipulation to enhance nutritional properties of tomato fruit and to increase tolerance to drought and salinity.
